- What can you legally put on your Web site? And what's not allowed?
- Do you really own your domain name?
- Can a library censor your Internet use?
- Do you know who's reading your e-mail?
- Is it legal to gamble online?
- How "private" is your private information after you disclose it to a Web site?
- Can you get in trouble for making a gripe site about that business that ripped you off?
- Is a student exercising his First Amendment rights when he creates a hate Web site on a public school's Internet server?
- Did you know the Web sites you visit and the words you type into search engines are being logged?

These are just some of the issues addressed in this book.
